# Flashing Dot to Dot Patterns

This activity continues helping you remember what you see. Dot to dot patterns will be flashed on the screen which you then have to draw.

Step 1. Three lines

When you click on '**Start**' at the bottom of the screen, a pattern of lines connecting between dots will flash on the screen. There will be 3 lines on each pattern. You have to remember the pattern of lines then draw it on another grid of dots. An example is shown below.

When you have drawn your pattern, click on '**check**' at the bottom of the screen to compare your drawing to the one that was flashed.

Click on '**Start**', draw your pattern then click on '**check**' to compare. Then click on '**Start**' again to show another pattern.

Your goal is to get at least 8 out of 10 correct.

Notes for helpers:
A good way to do this activity is to draw a 3x3 dot pattern on a piece of paper. Then put the paper in a clear plastic sleeve. If a water-based marker is used to draw on the plastic sheet, between the dots, it can be rubbed off with a tissue when the pattern has been drawn and checked. This way the dot by dot pattern can be used again and again.

Step 2. Four lines

Click on '**Level**' at the top of the screen and click on '**Level 2**'.

Now a pattern of lines will again be presented, but there will be 4 lines on the pattern.

Then click '**Start**' at the bottom of the screen.

A pattern of 4 lines connecting between dots will flash on the screen. Remember the pattern then draw it on your grid of dots.

When you have drawn your pattern, click on '**check**' at the bottom of the screen to compare your drawing to the one that was flashed.

Click on '**Start**' again to show another pattern.

Your goal is to get at least 8 out of 10 correct.

Step 3.Five lines

Click on '**Level**' at the top of the screen and click on '**Level 3**'.

Now the pattern of lines that will be flashed will be on a 5 lines on each pattern. So, the pattern is more complicated.

Click on '**Start**' to show the pattern and draw it on your grid. Then check the pattern.

Your goal is to get at least 8 out of 10 correct.

Step 4, Four lines with counting

Click on '**Level**' at the top of the screen and click on '**Level 2**'.

Click on '**beat**' at the top of the screen.

Start counting to 10 in time to the beat - when you begin to count, your helper will click on '**Start**' to flash 4 lines between the dots. Continue counting, saying each successive number in time to the beat until you reach 10. Now, draw the

lines between the dots but do not stop counting until you have finished the pattern.

Your goal is to get 8 or more correct out of 10.
